NEW

BSc (Hons) Equine Studies /
Foundation Degree in Equine Studies

If you are:

- Fascinated by horses
- Interested in a career in the equine industry.

Anglia Ruskin University and The College of West Anglia have developed two new Equine degree courses in Cambridge

www.anglia.ac.uk

NEW

The College of West Anglia

Degrees in Equine Studies

Anglia Ruskin University is renowned for its animal behaviour related degrees, whilst the College of West Anglia (CWA) is highly respected for its equine courses at its Cambridge campus.

The two institutions have come together to jointly deliver a Foundation Degree and a full Bachelor of Science degree in Equine Studies.

These courses have been designed to meet the academic and practical needs of individuals seeking careers in the internationally developing equine industry.

Jointly delivered at the Cambridge campuses of Anglia Ruskin University and the College of West Anglia, students have the benefit of access to an extensive range of resources at both institutions.

Equine facilities include:

- indoor arena
- outdoor arena
- horse walker
- equine spa
- aqua treadmill
- full stable yard
- solarium

Graduates from these courses will be fully prepared for positions within nutrition, welfare, training or management.

In addition to the fundamental understanding of horse anatomy, physiology, health and traditional training methods, the course will give students the opportunity to explore both the science and the practical application of the latest techniques in the equine world, including:

- equine hydrotherapy
- gait analysis
- reproduction
- training techniques

Class tuition will be complemented by a range of visits to equine events and establishments, such as:

- studs
- trainers' yards
- therapists
- equine charities

Examples of modules which make up the Foundation Degree Equine Studies include:

- anatomy and physiology
- schooling on the ground
- biology and behaviour
- equine exercise physiology
- equine health and disease
- equine rehabilitation and therapy

Please send me further information about the new equine degrees:
